TAKING UTTAR PRADESH TO NEW HEIGHTS: THE CIVIL AVIATION SECTOR

By: Mishika Nayyar, Strategic Investment Research Unit, Invest India

FOREWORD

The relentless efforts of the government to create a flourishing civil aviation hub in Uttar Pradesh has borne fruit. Development of civil aviation infrastructure in the state has a multiplier effect in boosting air connectivity, generating employment opportunities, and advancing trade and commerce.

Uttar Pradesh boasts of 9 operational airports of which 3 are international airports and 6 are domestic airports. The state will also witness the coming up of 12 airports of which 2 are international airports and 10 are domestic airports. The Civil Aviation Promotion Policy of Uttar Pradesh is a big step towards attracting investment into the aviation sector of the state and in turn the nation.

A momentous occasion for civil aviation in Uttar Pradesh was marked by the inauguration of Kushinagar International Airport by Hon'ble Prime Minister on October 20, 2021. This will be followed by upcoming launch of Asia's largest airport, Noida International Airport in Jewar. Seamless connectivity, quick and efficient aircraft turnarounds minus the risk to the environment is what makes the upcoming Noida International Airport in Jewar, truly world class.

The government of Uttar Pradesh is currently targeting the completion of 12 more airports at war footing, including two international aerodromes. The progress of civil aviation is a reflection of the good governance and leadership of the state, which is now touching a passenger demand of 535.8 million. Besides this, promotion of training and development institutions in the aviation field is a priority, along with strengthening the Maintenance, Repair and Overhaul (MRO) facilities in the state.

I congratulate the Strategic Investment Research Unit (SIRU) at Invest India who is responsible for executing the launch of the report on 'Taking Uttar Pradesh to new heights: The Aviation Sector.' The publication will prove to be a helpful resource for mapping initiatives and stakeholder analysis in the aviation sector of Uttar Pradesh.

S P GOYAL

Additional Chief Secretary, Government of Uttar Pradesh

INTRODUCTION

Broadly divided into military and civil aviation, India is the third largest domestic aviation market in the world with the potential to become the third largest by total passengers carried, in less than a decade as per industry reports. The growth in the civil aviation industry in India in the last three years, has been unmatched. Contributing USD 30 Billion (Bn) annually to the country's Gross Domestic Product (GDP), the aviation industry generates employment for 7.5 Million (Mn) people.

India is expected to overtake China and the United States as the world's third-largest air passenger market in the next ten years, by 2030, according to the International Air Transport Association (IATA).

India's passenger traffic stood at 115.37 Mn in FY21. In March 2021, the average daily passenger traffic stood at 546,702.90. In FY21, freight traffic on airports in India was pegged at 2.47 MT which has the potential to reach 17 MT by FY40. Aircraft movement currently stands at 1.20 Mn in FY21.

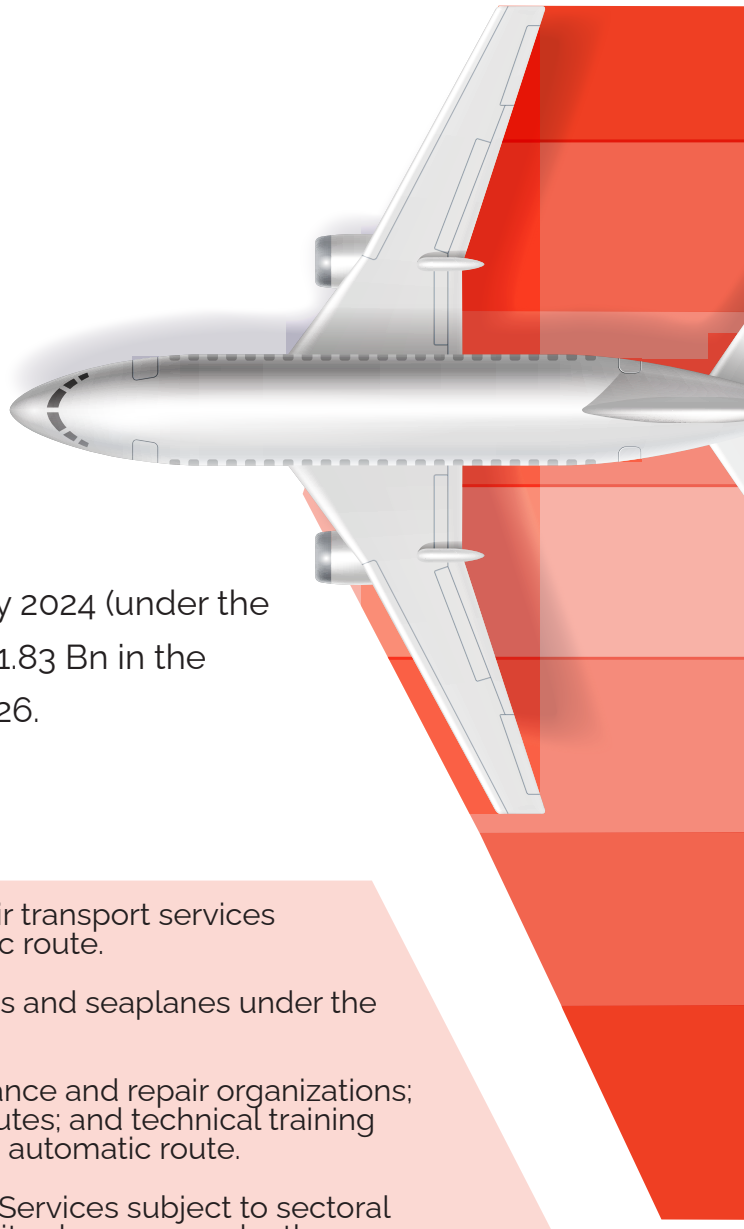
To cater to the rising air traffic, the Government of India has been working towards increasing the number of airports. As of 2020, India had 153 operational airports. The Government of India has been working towards increasing the number of airports from 153 to 200 by FY40. Further, the rising demand in the sector has pushed the number of airplanes operating in the sector. The number of airplanes is expected to reach 1,100 planes by 2027 and approximately 2500 planes by 2038.

11% Passenger traffic growth

15.9% Foreign Tourist Arrival growth

3.6 MMT Total freight traffic (MMT)

14.4% Domestic aircraft movement growth



Currently, the country has 128 operational airports including 29 international, 89 domestic, and 10 custom airports. To meet the growing demand for air travel in India, it has become imperative to increase the capacity of airport infrastructure. To augment the airport infrastructure the government aims to develop 100 airports by 2024 (under the UDAN Scheme) and expects to invest USD 1.83 Bn in the development of airport infrastructure by 2026.

UP TO 100% FDI IS PERMITTED IN

- Non-scheduled air transport services under the automatic route.
- helicopter services and seaplanes under the automatic route.
- MRO for maintenance and repair organizations; flying training institutes; and technical training institutes under the automatic route.
- Ground Handling Services subject to sectoral regulations & security clearance under the automatic route.

1. SNAPSHOT OF AVIATION SECTOR IN INDIA

India is set to be the **3rd largest** and amongst fastest growing aviation markets in the world by 2026.

GDP	Civil Aviation industry contributes USD 30 billion annually to India's GDP
REVENUE	USD 1.929 Billion Revenue of Airports Authority of India in 2019-20
EMPLOYMENT	Aviation industry supports 7.5 million Indian jobs.
PASSENGER TRAFFIC	In 2010, 79 million people traveled to/from/or within India. By 2017 that doubled to 158 million. That number is expected to treble to 520 million by 2037.
GROWTH PROJECTIONS	The nation's airplane fleet is projected to quadruple in size to approximately 2500 airplanes by 2038.
FREIGHT TRAFFIC	Grew at a CAGR of 5.32% during FY16–FY20 from 2.70 MT to 3.33 MT Expected to grow at a CAGR of 7.27% to reach 4.14 MT in FY23
AIRCRAFT MOVEMENT	Aircraft movement grew at a CAGR of 9.56% from 1.60 million in FY16 to 2.59 million in FY20 Domestic movement increased at a CAGR of 9.83% and international movement expanded at a CAGR of 3.57%.

The expenditure of Indian travelers is expected to grow to **USD 136 billion by 2021.**

FDI

FDI inflow in air transport sector reached **USD 2.75 Bn** between April 2000-March 2020.

CARRIER DEMAND

India will need **2,380 additional commercial airplanes** by 2038.

AIRPORT INFRASTRUCTURE

125 operational airports in India.

India plans to develop **100 airports by 2024**

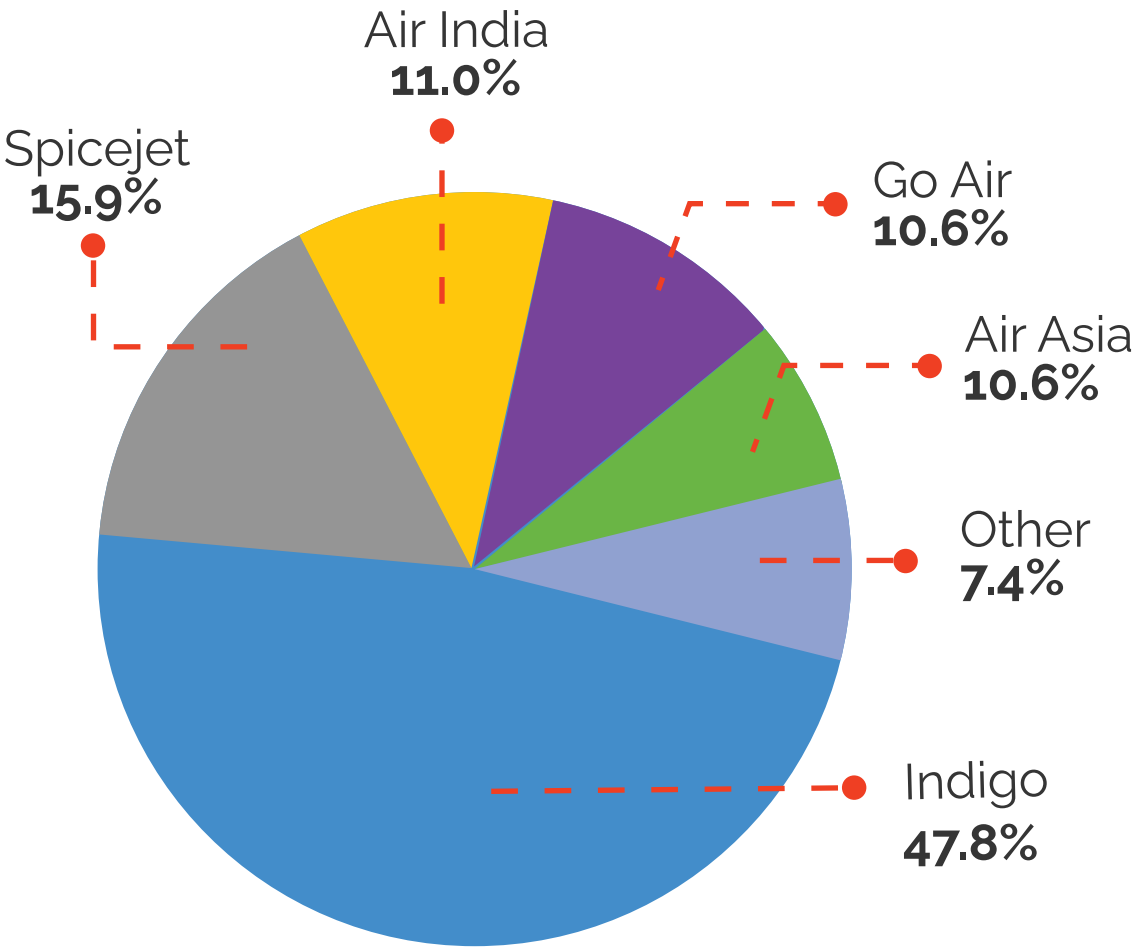
2. AIRPORTS PRIVATIZATION SCENARIO IN INDIA

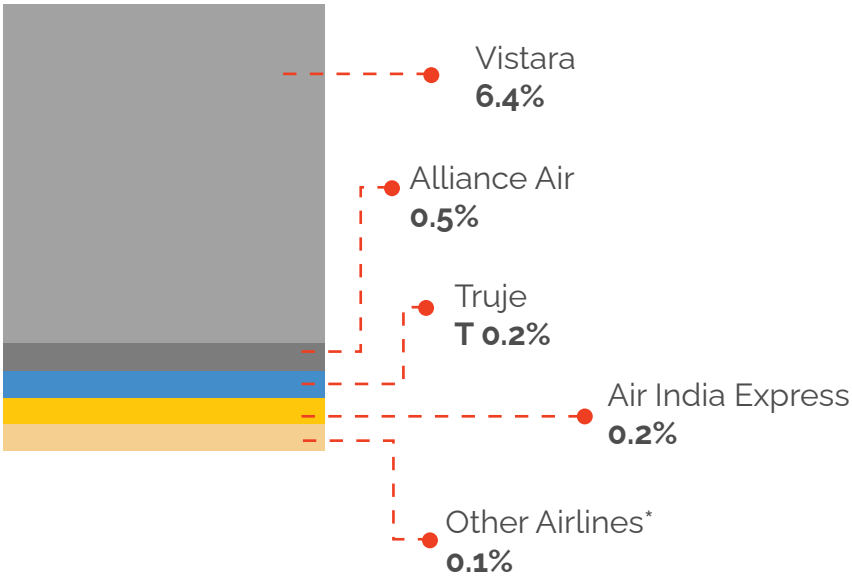
- Under PPP **agreement**, Adani Enterprises awarded concessionaire status in 2019. Handover of **Mangaluru Airport and Lucknow Airport** to the Adani Group completed. Will now be followed by **Ahmedabad Airport**.
- Airports are being leased out for **50 years**.
- Apart from these airports, **Delhi** and **Mumbai airports** have also been privatized and maintained by **GMR** and **GVK** respectively.
- The government to privatize **30-35 airports** in the next **five** years.

The Airport Authority of India is working on the next round of privatization in which 06-10 airports will be included.

Six airports have already been awarded to the successful bidder and the concession agreements have been signed.

DOMESTIC MARKET SHARE (%) IN TERMS OF PASSENGERS CARRIED, 2019-20





JET AIRWAYS,STAR AIR, JET LITE, AIR HERITAGE, PAWAN HANS, AIR DECCAN

UTTAR PRADESH - THE EMERGING ECONOMIC POWERHOUSE AND HUB OF CONNECTIVITY

Situated in north-central part of India, Uttar Pradesh is bordered by the state of Uttarakhand and the country of Nepal to the north, the state of Bihar to the east, the states of Jharkhand and Chhattisgarh to the southeast, the state of Madhya Pradesh to the south, and the states of Rajasthan and Haryana and the national capital territory of Delhi to the west.

Home to 17.22% of India's population, Uttar Pradesh ranks number 2 in the Ease of Doing Business (EoDB) 2019 state ranking as per Business Reform Action Plan (BRAP). This improvement in ranking can be testified by Uttar Pradesh's exemplary performance in not only implementing notable reforms like Nivesh Mitra – single window system, but also attracting big names like PepsiCo, Von Wellx, IKEA, and AB Mauri among others, bringing in huge investments.

Having its economy primarily driven by agriculture, the state is witnessing a substantial upsurge in industrial manufacturing. Sectors that substantially contribute to the state's overall industrial output include electronics sector, information technology (IT), tourism, fabricated metals, textiles and apparel, handlooms and handicrafts, biotechnology leather-based and sports goods industries, food processing/products and petroleum. High livestock population in the state makes it one of the leading producers of leather products. The state is also a leader in milk production and multiple food and horticulture crops such as wheat, sugarcane, potato, and mango.

ADVANTAGE UTTAR PRADESH

Top growth cities include Noida, Lucknow, Agra, Meerut, Ghaziabad, Kanpur, Gorakhpur, Varanasi, Jhansi

Highest number of Million+ Urban-Agro agglomeration in India

Being India's **2nd largest economy**, State's GSDP has grown 10 percent in last 3 years (2017-18 to 2019-20)

UP categorised as **"Achiever State"** on implementing 'Ease of Doing Business' reforms.

Being a landlocked state, Uttar Pradesh boasts extensive connectivity through its 6 expandable to 8 lane expressways, linking national capital to provide a huge market for products and services. Apart from the upcoming Asia's largest international airport at Jewar, investors find the government's hand holding process and time-bound clearances without procedural delays as a significant cause for choosing Uttar Pradesh as the right destination to do business.

Uttar Pradesh is also undergoing a major transformation in terms of infrastructure. Falling under the influence area of key industrial corridors such as North-South and East-West (NS-EW) Corridor, the state has built several expressways and highways providing the last mile connectivity to the most remote parts of the country. There are 12 major rivers that pass through the state, including the Ganges, on which the first inland waterways is being created. Noida-Greater Noida region in the state is home to eight operational IT SEZs and will receive more impetus to become a global investment hub with the upcoming Jewar airport. The state has the highest number of cities identified under the Smart Cities Mission of the government.

Uttar Pradesh emphasizes promoting domestic entrepreneurship and employment opportunities across large, medium and small enterprises both urban and rural with a rich resource base and a favourable demographic dividend (56 percent of its population size under working age group) setup. The state saw over 143,000 MSMEs and heavy industrial units setup their base during the 12th five-year plan. Classified among India's top five manufacturing states, Uttar Pradesh has the highest number of MSMEs, 9 Million in number.

Logistics Performance Index (2019)- **9th Rank**

Amongst **Top 5 exporting states** of India registering highest export growth of 18percent year on year (2019) & State's contribution to India's Exports (FY 19): 4.8 percent

More than **20,000 acres** of ready to move industrial land bank

#1
number of micro, small and medium enterprises (MSME) in India.
14.2percent of total

#1
milk-producer
in India

#1
producer of foodgrains in India
(FY 18) 18.5 percent of total

The state has also been a torchbearer of formulating and implementing attractive policies to promote industrial growth, bringing in investments and ensuring sustainable development. The Industrial Investments and Employment Promotion Policy 2017 is an umbrella policy providing attractive incentives to all industries irrespective of sector offering a range of incentives on land, capital, transport, infrastructure interest, so on and so forth. The state government has come up with specific policies for 20+ sectors and accorded the highest priority to preserving, reviving and popularizing local arts and crafts by formulating a landmark program of 'One District, One Product' (ODOP) scheme. ODOP acquires further significance and relevance in the context of the pioneering campaign launched by Prime Minister Narendra Modi, called the "Aatma Nirbhar Bharat Abhiyan" aiming to strengthen the domestic industries and making India self-reliant.

Making a significant jump of 12 positions in the EoDB state rankings, Uttar Pradesh, the heartland of India, has managed to defy all odds amidst the pandemic. People, process, technology, and resources have been the hallmark of e-Governance practice by the Government of Uttar Pradesh which has not only increased the revenue by checking the loopholes and making the system transparent but also reduced the cost of administration for the state government.

#2
producer of hydel power

#2
producer of leather products in India

#3
fabric producer

#5
silk producer in India

#5
state for manufacturing. No. of Factories in State (FY 18): 15,830

1,000 miles of inland waterways opening up South east Asian market

#3
producer of thermal power

Around 1120 miles of 6 lane, expandable to 8 lane expressways and **10,000 miles of railway network**

9 operational airports (3 international airports, 6 domestic airports) 12 upcoming airports (2 international airports, 10 domestic airports)

Upcoming world class international airport city at Jewar about 1.50hrs drive from the capital

75 Universities ,4000+colleges, 125,000+ ITI seats and world class institutes like IIT-K, IIT-BHU, IIM-L etc.

CONSUMPTION METRICS

- India's Largest consumer base with **230 million population** (16.5 percent of total Indian population) (Census 2011)
- Rapidly urbanising, UP is India's **2nd largest urban state** (11.7 percent of India's urban population); 28percent growth in urban population (Census 2001- 2011)
- **7 percent** growth in Per capita income in last 3years (2017-18 to 2019-20)
- Hosts seven cities with **1 million plus** and seven others with over **0.5 million plus** population

AVIATION SECTOR IN UTTAR PRADESH

India is the third largest domestic aviation market in the world with the potential to become the third largest by total passengers carried and leading this growth journey is the state of Uttar Pradesh.
From the year 1947 to 2015, only two airports were functional in Uttar Pradesh. While Lucknow and Varanasi were main destinations and handled regular crowd, the airports at Agra and Gorakhpur seldom had flights before 2017. The state will soon have five international airports, the maximum in the country. In just three years, five other airports including Gorakhpur, Hindan, Agra, Prayagraj and now Bareilly have become functional in Uttar Pradesh.

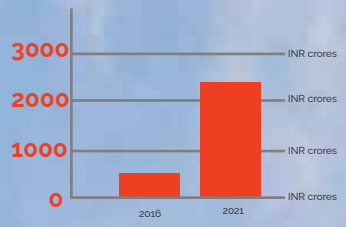
The state government is focusing on the 'Civil Aviation Promotion Policy', as a means to attract investment into tourism of the state. Dream airport projects - two international aerodromes, the upcoming Jewar International airport (Nodia) and the recently inaugurated Khushinagar International airport by Honorable Prime Minister are going to be one of the top choices for tourists, taking off the load form the Indra Gandhi International airport (IGIA), New Delhi. The Uttar Pradesh government's move to promote 11 new airport (along with 12 new airports aerodromes) is being praised for its futuristic vision and its modern-day facilities. The idea is that the capital city Lucknow, should have connectivity with almost 75 cities is a great step in the direction of balanced development of districts.

Uttar Pradesh, the largest state in India in terms of population has allotted INR 2,307 crore for the civil aviation sector while compared to INR 347 crores in 2016.

In the year 2017, only 04 airports (Lucknow, Varanasi, Gorakhpur and Agra) were functional within the state and a total of 25 destinations (15 from Lucknow, 8 from Varanasi, 1 from Gorakhpur, 1 from Agra) were connected by air services.

Now, Uttar Pradesh boasts of 9 operational airports of which 3 are international airports and 6 are domestic airports. The state will also witness the coming up of 12 airports of which 2 are international airports and 10 are domestic airports.

STATE BUDGET ALLOCATION TO THE CIVIL AVIATION SECTOR

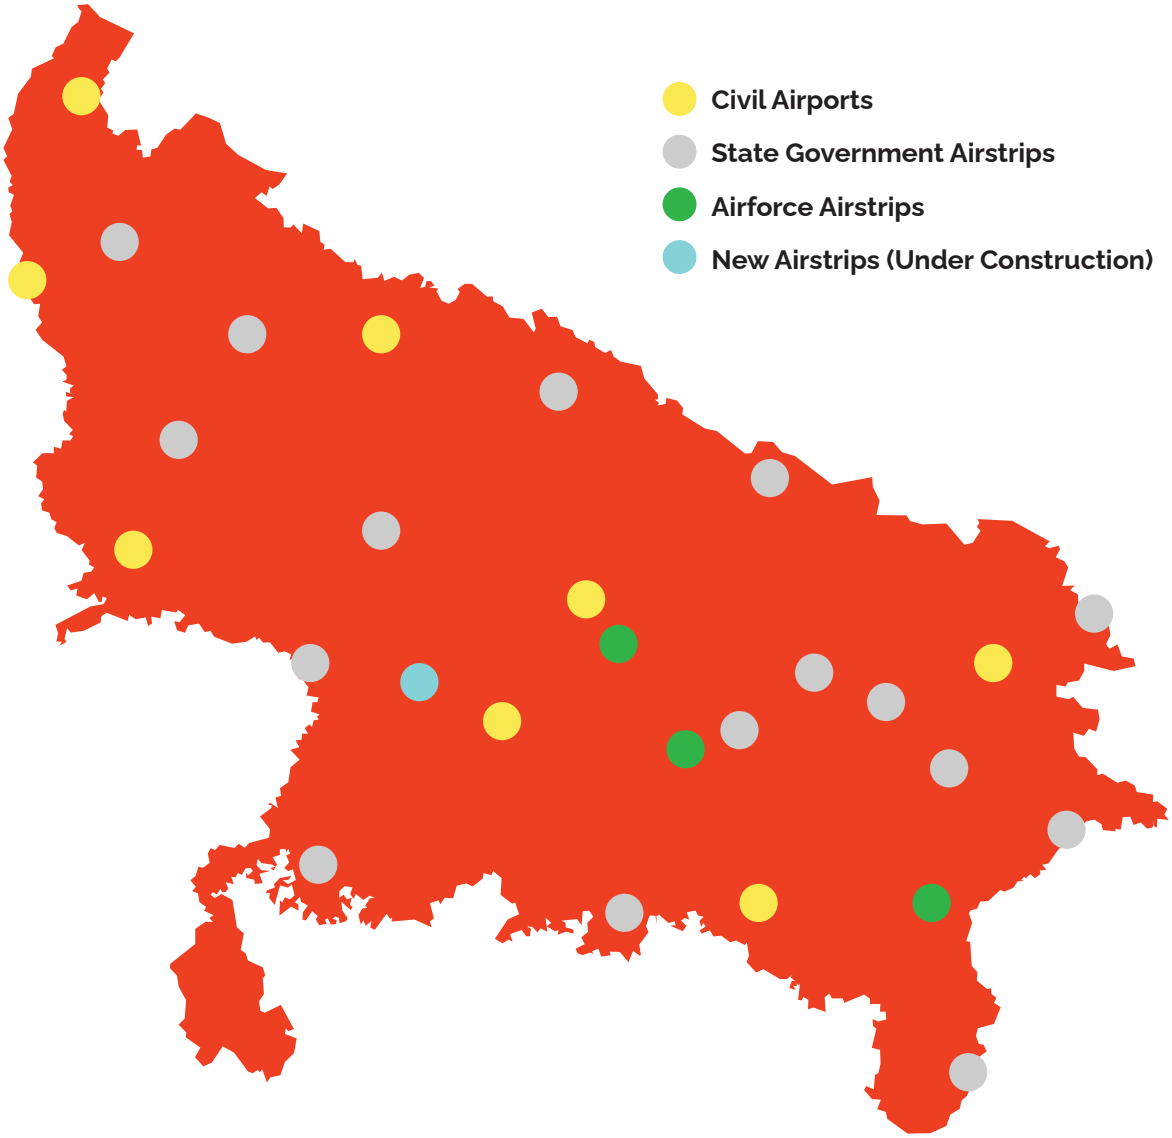


At present 09 airports have become functional from which total 74 destinations (21 from Lucknow, 20 from Varanasi, 8 from Gorakhpur, 5 from Agra, 11 from Prayagraj, 4 from Kanpur Nagar, 2 from Hindon, 3 from Bareilly) Services are available. **In addition, Kushinagar International Airport is now functional after inauguration by Hon'ble Prime Minister.**

In all, flights are available for 59 national and 12 international destinations from Uttar Pradesh 09 airports.

In 2019, the domestic passenger growth rate was at whopping 19.6 per cent. Leading the domestic market in aviation is Uttar Pradesh. Thus, the state has invested INR 2307 crores in the civil aviation sector for upgrading the air strips as well as developing aerodromes in the upcoming three-years. The vision is to open the defence airbase for civil use, reducing the distance on various air routes and making 50 airbases available operational under the UDAN scheme reforms.

AVIATION MAP OF UTTAR PRADESH



POLICY LANDSCAPE FOR AVIATION SECTOR IN INDIA AND UTTAR PRADESH

1. NATIONAL AVIATION POLICY

UDAN-RCS (Regional Connectivity Scheme)	Make flying affordable & convenient for masses An hour-long flight fare to be **INR 2,500/ pax** on regional routes to Tier 2 and Tier 3 cities
BTR (Bilateral Traffic Rights)	**"Open Sky"** ASA with SAARC & other countries located **>5,000 kms** from Delhi Signed "open sky" ASA's with Japan, Greece, Jamaica, Guyana, Czech Republic, Finland, Spain & Sri Lanka
Propel airports development	**"Hybrid till"** airport tariff model **30%** of non-aero revenues to cross-subsidize aero charges Enhance non-aero revenues through better utilize commercial city side land advantage
0/20 rule to provide level playing field	Five years of domestic operations clause to fly overseas **- scrapped** Airlines allowed to fly overseas, if they deploy 20 aircrafts or 20% of total capacity, whichever is higher for domestic operations
MRO Sector Focus	Foreign aircraft brought to India for MRO work will be allowed to stay for the entire period of maintenance or up to 6 months, whichever is lesser

2. NIRMAN POLICY

01

Estimated investment

Over next 10 years, investments to be made for airport upgradation

Investments to be made both by the private sector and the state-owned Airports Authority of India (AAI)

02

10-year target

By 2027

-Expand airport capacity by five times

-Develop 100 airports in India

-Carry out one billion air trips/ year

03

Challenges

GoI to take initiatives for NABH Nirman success

-Revise regulatory framework for airports

-Look at multiple aerodromes in metro cities

-Forging state partnerships; strengthening AAI; boosting ANS (air navigation system); work out financing options for viable & non-viable airports

04

AAI role in NABH scheme

-AAI to bid & mandate capital expenditure (capex) decisions

-AAI to look at issuing masala bonds, raising debt, & tapping the bond market, both in India and abroad to start work capex works worth ~Rs. 200 bn

3. GIFT CITY ADVANTAGES FOR THE AVIATION SECTOR

The aircraft leasing and financing businesses are operated from the International Financial Services Centre (IFSC) and GIFT City provides the off-shore status for financial services.

Global financial and IT hub with an integrated development making this city a "Walk to Work" City

Conducive Multi-Service SEZ (Special Economic Zone) and an exclusive Domestic Area

Located on the bank of river Sabarmati connecting the Business capital (Ahmedabad) and Political capital (Gandhinagar) of Gujarat

3.1. Aircraft leasing

Capital gains on the transfer of aircraft leased by an IFSC unit to a domestic company eligible for 100% deduction.

Income by way of royalty on account of lease rentals paid to foreign entities exempt from tax.

Aircraft leasing unit in IFSC shall commence operations on or before 31 March 2024.

3.2. Tax incentive available in GIFT city

Tax Income	100% tax exemption for 10 consecutive years out of 15 years MAT / AMT 9% of book profits applies to Company / others setup as a unit in IFSC. MAT not applicable to companies in IFSC opting for new tax regime. From 01 April 2020, dividend income distributed by Company in IFSC to be taxed in the hands of the shareholder.	• Interest income paid to non-residents - Monies lent to IFSC units not taxable. - Long Term Bonds & Rupee Denominated Bonds listed on IFSC exchanges taxable at lower rate of 4% • Transfer of specified securities listed on IFSC exchanges by a non-resident or Category III AIF located in IFSC not treated as transfer - Gains accruing not chargeable to tax in India. • Specified securities include Bond, GDR, Foreign currency denominated bond, Rupee-denominated bond of an Indian company, Derivatives, Unit of a Mutual Fund. Unit of a business trust, Unit of Alternative Investment Fund and Foreign currency denominated equity share of a company
Goods and Services Tax	No GST on services - provided to IFSC / SEZ units GST applicable on services provided to DTA	No GST on transactions carried out in IFSC exchanges
Other taxes and Duties	State Subsidies - Lease rental, PF contribution, electricity charges	Exemption from STT,CTT, stamp duty in respect of transactions carried out on IFSC exchanges

The rise in demand for air travel in India has necessitated the development of a robust ecosystem and supportive government policies.

Through the **National Civil Aviation Policy 2016 (NCAP)** the government plans to take flying to the masses by enhancing affordability and connectivity. It promotes ease of doing business, deregulation, simplified procedures, and e-governance.

The **Regional Connectivity Scheme or UDAN ('Ude Desh ka Aam Nagrik')** is a vital component of NCAP 2016. The scheme plans to enhance connectivity to India's unserved and under-served airports and envisages to make air travel affordable and widespread. Under the scheme, airfare for a one hour journey of 500 km has been capped at INR 2,500, as an all inclusive charge.

The **National Civil Aviation Policy (NCAP)** significantly covers the MRO industry and specifically focuses on easing the pain points that have traditionally impacted the Indian aviation sector. In April 2020, the Goods and Services Tax for MRO services rendered locally was reduced from 18% to 5%. The 'place of supply' for B2B MRO services was changed to the 'location of recipient', enabling Indian MRO facilities to claim zero-rating (i.e., export status) under GST laws on MRO services rendered to prime contractor/OEM located outside India.

This has been an extremely crucial policy amendment as it will encourage global participation in the Indian aviation sector by allowing foreign MRO operators to subcontract MRO work to Indian entities without any extra tax liability.

Production Linked Incentive (PLI) Scheme

The Central Government under the leadership of Hon'ble Prime Minister Shri Narendra Modi has approved the Production-Linked Incentive (PLI) scheme for drones and drone components. The PLI scheme comes as a follow-through of the liberalised Drone Rules, 2021 released by the Central Government on 25 August 2021. The PLI scheme and new drone rules are intended to catalyse super-normal growth in the upcoming drone sector.
INR 120crore scheme outlay

CIVIL AVIATION PROMOTION POLICY OF UP 2017

> We are happy to work in Uttar Pradesh as this region has huge potential to explore. This region has infrastructure, traffic and a big catchment area
>
> **- DANIEL BIRCHER,**
> CEO OF ZURICH AIRPORT

NOTIFICATION DATE

24 AUGUST, 2017

Uttar Pradesh becomes an untapped state when it comes to Civil Aviation providing an immense amount of scope for development. At present, there are 3 international airports at Lucknow, Varanasi and Kushinagar, 6 domestic airports and 12 upcoming regional airports. Air Cargo traffic is growing at 1800 Mn tons of freight, handled by Lucknow and Varanasi in 2019-20. Apart from the ambitious upcoming Jewar airport and the recently inaugurated Kushinagar International Airport projects, the state has 4th highest number of helipads at 68 in India.

Regional Connectivity Scheme (RCS) of Union Government under Ude Desh ka Aam Nagrik (UDAN) is greatly building the state's aviation sector as 7 projects at Aligarh, Azamgarh, Moradabad, Shravasti, Chitrakoot, Sonbhadra and Jhansi are under progress in Phase 1 and Phase 2 whereas 4 new projects at Meerut, Saharanpur, Ayodhya and Ghazipur are identified under RCS phase 3. The policy provides support for development of air cargo hubs and fulfillment centers along with facilitating the growth of Maintenance, Repair and Overhaul (MRO) companies in the state.

OBJECTIVES OF CIVIL AVIATION POLICY 2017

- To create a conducive business environment, provide adequate incentives for the development of robust civil aviation infrastructure and to aid in attracting investments to realize the untapped potential in the aviation sector.

- To improve the air connectivity through development of new routes under RCS by providing incentives and also to facilitate inter-connectivity of non-RCS airports of U.P. To realize the full potential of tourism by linking major state tourist destinations with rest of India and the world. To facilitate trade and generation of employment opportunities.

- To give a boost to agro-exports, other perishable goods, manufacturing and e-commerce businesses in UP by supporting the development of air cargo hubs and fulfillment centers. To support the growth of aviation sector by developing human resource and generate direct, indirect and induced employment opportunities in the sector. To facilitate the growth of Maintenance, Repair and Overhaul (MRO) facilities in the state.

FEATURES OF CIVIL AVIATION POLICY 2017

1. VAT on Aviation Turbine Fuel (ATF) for 10 years for RCS airports
- Zero for 01 year for connecting non-RCS airports in UP with non-RCS airports outside U.P.
- Zero for 01 year for connecting non-RCS airports within U.P.

2. Viability Gap Funding (for 50% of total seat) @ 20% State Share as per RCS

3. Electricity @ INR 4/unit up to 30000 units

4. Reimbursement of S-GST on sale of air tickets
- 100% reimbursement for 3 years for RCS flights
- 100% reimbursement for 1 year for new flights in connecting non-RCS airports within U.P.

5. Zero charges for airport parking/night halt at RCS airports (for 3 years) at GoUP Airports

6. Office space (100 sqm) for airlines at GoUP RCS airports @ Zero Rental (for 3 years) at GoUP Airports

7. Route Navigation & Facilitation Charges (RNFC) @ 50% of RNFC (up to INR 2000 (USD 27.78)) will be reimbursed on RCS airports or flights connecting divisional headquarters (for 3 years)

POLICY ON USE OF AIRSTRIPS FOR TRAINING PROGRAMMES AND FLYING CLUBS/ACADEMIES IN THE FIELD OF AVIATION

Under the policy, flying clubs and academies selected by the Civil Aviation Department in 13 air strips in the state will be allowed to conduct training programmes at hangars and buildings.

1. Akbarpur (Ambedkar Nagar district),
2. Andhau (Ghazipur),
3. Shravasti,
4. Farrukhabad,
5. Dhanipur (Aligarh),
6. Amhat Sultanpur),
7. Myorpur (Sonbhadra),
8. Saifai (Etawah),
9. Palia (Kheri),
10. Jhansi,
11. Rasulabad (Kanpur Dehat),
12. Azamgarh
13. Chitrakoot.

PLANNING FOR HUMAN RESOURCE FOR UP AIRBASES

Growth in civil aviation industry will call upon for more trained work force including pilots, aircraft maintenance engineers, cabin crew, IT and support service professionals, airport related professionals etc. State government will promote aviation related courses in premier institutes / universities in Uttar Pradesh. For example, IITs, NIT and universities like Lucknow, Allahabad, Aligarh, Agra, BHU, Rohilkhand, Meerut will be ideal to generate skilled work force and professionals for civil aviation sector. Uttar Pradesh training institutes and colleges can provide skilled and trained work force for other states as well.

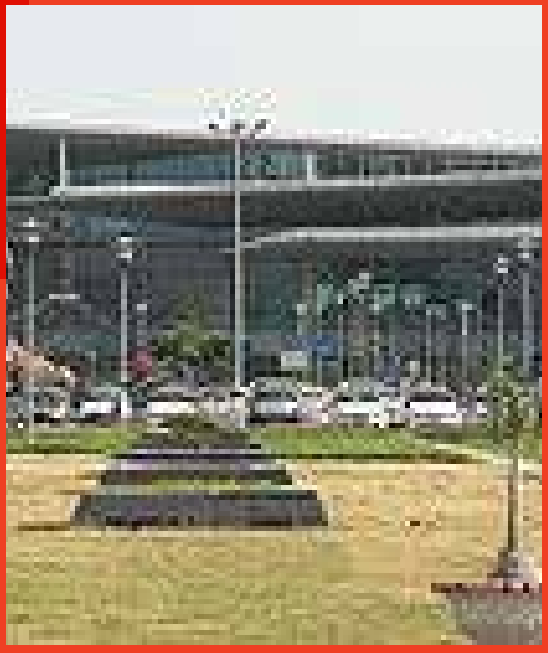
At present, Uttar Pradesh caters to Indira Gandhi Rashtriya Uran Akademi (IGRUA) in Amethi and six other private flying training academies (3 at Aligarh, 1 at Faizabad, Sultanpur and Kanpur) and are conducting Commercial Pilot License (CPL) courses approved by Directorate General of Civil Aviation (DGCA).

Also, Uttar Pradesh is home to the Aeronautical Training Institute (ATI) at Lucknow, which is a state owned entity. It provides diploma courses for AME in Airframe & Engine, avionics, helicopter operations and power plant trainees. This is also a futuristic necessity in expansion of civil aviation in Uttar Pradesh.

DETAILED AIRPORT PROFILE OF THE INTERNATIONAL AIRPORTS IN THE STATE

LUCKNOW

Brief description	Chaudhary Charan Singh Airport is an international airport situated in Lucknow, the capital city of Uttar Pradesh. It is situated in the Amausi area of the city and was earlier known as Amausi Airport. It was later renamed in 2008 after Chaudhary Charan Singh, the fifth prime minister of India. Presently, the airport is being operated under PPP model by Adani Lucknow International Airport Lucknow.
Surrounding infrastructure	The airport is connected to Lucknow by Lucknow Metro, Road Transport as well as Railways. The Red Line metro station of Chaudhary Charan Singh International Airport metro station is the airport terminus. The airport is also very well connected through Lucknow-Kanpur national highway, outer ring road of Saheed Path and connected with main railway station & bus station of Lucknow city.
Number of destinations it connects	As on 31st March, 2021, Lucknow had flights for 21 National and International Destinations
Passenger handling capacity	13.6 MPPA (Million passengers per annum)
Operating model	PPP Model
Financial model	Revenue INR 171 per passenger to AAI by ALIAL
Achievements	It is being operated with 2 terminal buildings. Third terminal is under construction.



DETAILED AIRPORT PROFILE OF THE INTERNATIONAL AIRPORTS IN THE STATE

VARANASI

Brief description	Lal Bahadur Shastri Airport is an international airport located at Babatpur, 26 km northwest of Varanasi. Formerly known as Varanasi Airport, it was officially renamed after **Lal Bahadur Shastri, the 2nd Prime Minister of India, in October 2005**. It is India's 18th-busiest airport in terms of passenger movement and second-busiest airport in Uttar Pradesh. The airport is awarded as the best airport in Asia-Pacific in 2020 (2 to 5 million passengers per annum) by Airports Council International.
Surrounding infrastructure	In a major boost to tourism, a new road avoiding congested areas will now be constructed to link Sarnath with Ring Road, which provides connectivity with Lal Bahadur Shastri International Airport as well as all the major highways, including Varanasi-Lucknow Highway (NH-56) and Varanasi-Ghazipur Highway (NH-29).
Number of destinations it connects	In Varanasi, flights were available for one international and seven national destinations which have gone up to 20 National and International Destinations.
Passenger handling capacity	4.5 MPPA (Million Passengers Per Annum)
Operating model	Operated by AAI (Public Sector Undertaking)
Achievements	**An integrated terminal serves both domestic and international flights**, with a floor area of 3,900 square metres (42,000 square feet). The terminal features 16 check-in counters with CUTE (Common-User Terminal Equipment), four immigration counters that double up as emigration counters, and two baggage-claim belts. Besides an upper-level seating area for the aero-bridge gates, the terminal features a ground-level gate to reach other aircraft on the apron on foot, or via shuttle bus. The apron can simultaneously park five narrow-body aircraft. The waiting area features essential services for the passengers, besides snack stalls, a travellers' convenience store, a bookstore with a newsstand, and stores selling merchandise indigenous to Varanasi, such as Banarasi Saris; and a VIP waiting lounge.

LAL BAHADUR SHASTRI INTERNATIONAL AIRPORT, VARANASI

DETAILED AIRPORT PROFILE OF THE INTERNATIONAL AIRPORTS IN THE STATE

KUSHINAGAR

Brief description	**The airport is situated at Kasia in Kushinagar, the Mahaparinirvana Sthali of Lord Buddha. Earlier the airport has a small airstrip belongs to State Government. Thereafter, the Government has decided to develop/upgrade the airstrip into an International Airport.** The airport is developed in FY 2020-21 and inaugurated on 20th October 2021. It is located 52 kilometres (32 mi) east of Gorakhpur Airport, 47 kilometres (29 mi) east of Gorakhpur, 34 kilometres (21 mi) north of Deoria, 60 kilometres (37 mi) southwest of Bettiah and 64 kilometres (40 mi) west of Gopalganj. In August 2021, the airport was licensed to operate as a customs notified airport, facilitating the movement of international passengers and Buddhist pilgrims. In June 2020, the airport was awarded international status to attract Buddhist pilgrims. In February 2021, the airport received all necessary clearances from the Directorate General of Civil Aviation (DGCA) to be recognized as the international airport, becoming the third international airport in Uttar Pradesh after Lucknow and Varanasi.
Surrounding infrastructure	The airport is surrounded by Mahaparinirvana Temple, Buddhist Temple, Wat Thai Temple and many other temples and tourist places.
Number of destinations it connects	To be connected soon
Passenger handling capacity	The airport terminal building has 300 peak hour passengers.
Operating model	Operated by AAI (Public Sector Undertaking)
Financial model	Operated by AAI (Public Sector Undertaking)
Achievements	The state government has developed the airport with an expenditure of around INR 250 Crores.
Progress so far	The airport is ready for operations.

A **momentous occasion** for civil aviation in Uttar Pradesh. The fruits of the labour of the last four and a half years culminated on 20th October 2021, when the **Hon'ble Prime Minister inaugurated the Kushinagar International Airport** during Abhidhamma Day celebrations at Kushinagar, stating that it would boost the aviation sector and help increase international tourism from Buddhist pilgrims around the world.

DETAILED AIRPORT PROFILE OF THE INTERNATIONAL AIRPORTS IN THE STATE

AYODHYA

Brief description	**The airport is situated at Ayodhya district, the birth place of Lord Sri Ram. There is a small airport which belongs to state government. The Government has decided to develop/upgrade the airstrip for B777-300 type of aircraft. The airstrip will be developed by AAI in three phases.** Ayodhya Airport, proposed to rename as Maryada Purushottam Shriram International Airport, is an upcoming international airport in Ayodhya, Uttar Pradesh that will be upgraded from the existing government airstrip. The existing government airstrip is situated between the NH 27 and NH 330 at Sultanpur Naaka, Ayodhya, in the Indian state of Uttar Pradesh. The State Government signed a memorandum of understanding with the Airports Authority of India (AAI) in February 2014 for the development of the airport in three phases. As per the compilation report, in the first phase, the airport would be made available for A-321 aircraft and will be upgraded for operations of B 777-300 type aircraft in the second phase.
Operating model	Will be operated by AAI (Public Sector Undertaking). In 2014, the Ayodhya Airport was handed over by the Government of Uttar Pradesh to AAI to be developed as full-fledged airport along with three others (Meerut, Moradabad and Ayodhya) by the approval of Uttar Pradesh cabinet. The Government of Uttar Pradesh is providing extra land free of cost for the further expansion and for the construction of a terminal.
Financial model	Land purchase & OLS Removal – State government Development works – AAI

DETAILED AIRPORT PROFILE OF THE INTERNATIONAL AIRPORTS IN THE STATE

AYODHYA

Achievements	Necessary funds released to District Administration for land purchase & OLS removal.
Progress so far	Around 320 acres of land purchased (near about land has been purchased for Phase -1). AAI to develop the airport.

On 26th January 2021, the **State Cabinet** approved an amount of approximately **INR 426 Crore** for purchase of additional land for the expansion and development of **Ayodhya Airport**. On **26th February 2021**, the Ministry of Civil Aviation, Government of India and Airports Authority of India approved the proposal of around INR 250 Crore for the development of Ayodhya International Airport.

DETAILED AIRPORT PROFILE OF THE INTERNATIONAL AIRPORTS IN THE STATE

JEWAR

Brief description	**The development of "Noida International Airport" at Jewar in Gautam Budh Nagar district is being done by the State Government on PPP mode. Necessary NoCs/clearances have been obtained for the project.** The Yamuna Expressway Industrial Development Authority (YEIDA) will be the implementing agency on behalf of the government of Uttar Pradesh. The proposed plan is to build a two runway airport by 2024, and at a future date, to expand it into a 7,200 acres (2,900 ha) 6-runway airport.
Surrounding infrastructure	Strategically located JEWAR (YEIDA), (YEIDA) at District Gautam Buddh Nagar • about 72 Km from IGI Airport, New Delhi • about 40 km from Noida • 28 km from Greater Noida • about 130 Km from Agra • about 40 Km from Multi-modal Logistic Hub (Dadri) • 40 Km from Faridabad • 65 Km from Gurugram • 40 Km from Ghaziabad • 45 Km from Aligarh With excellent approach roads in all directions • 100 meter wide Yamuna Expressway Connecting Greater Noida to Agra • 100 meter wide Eastern peripheral Expressway, passing through Yamuna Expressway at Formula One Track, connecting Palwal, Manesar, Ghazaibad, Bhagpat, Meerut.

DETAILED AIRPORT PROFILE OF THE INTERNATIONAL AIRPORTS IN THE STATE

JEWAR

Surrounding infrastructure	• 100 meter wide Proposed Expressway Palwal to Khurja (south side) • 130 meter wide road to NOIDA via Greater Noida (east side)
Number of destinations it connects	Delhi, Mumbai, Kolkata
Passenger handling capacity	**12 MPPA (planned in Phase-1)** According to the proposed plan, the airport will handle 5 million passengers per annum (MPA) initially and up to 60 MPA to 120 MPA, after its expansion over a period of 30 years.
Cargo handling capacity	0.75 MT (planned in Phase-1)
Operating model	PPP Model
Financial model	Revenue INR 400 per passenger to NIAL by YIAPL
Achievements	For development of Noida International Airport, "Zurich Airport International AG" has been selected as Developer through Global E-Tender process. Concession agreement, state support agreement, shareholder agreement, license memorandum have been signed with the developer.
Progress so far	Land purchased and all the formalities have been completed to start the development work by developer.

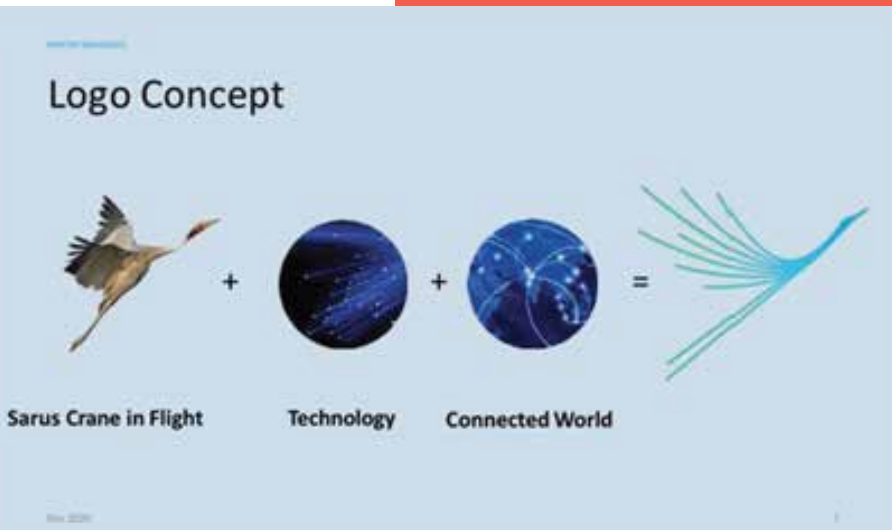
INDIA'S LARGEST AIRPORT

With six runways, once all its expansions are completed, it will be India's largest airport and among the world's largest airports. Only the Chicago–O'Hare and the Dallas/Fort Worth are larger, with eight and seven runways respectively. Other existing airports with six runways are Amsterdam, Detroit, Boston and Denver. As of September 2019, with three runways, the Indira Gandhi International Airport has the highest number of runways of any airport in India.

The first meeting with **Zurich International Airport AG** regarding the Master Plan of **Noida International Airport at Jewar** took place in Lok Bhawan, Lucknow on **4th February 2020**.

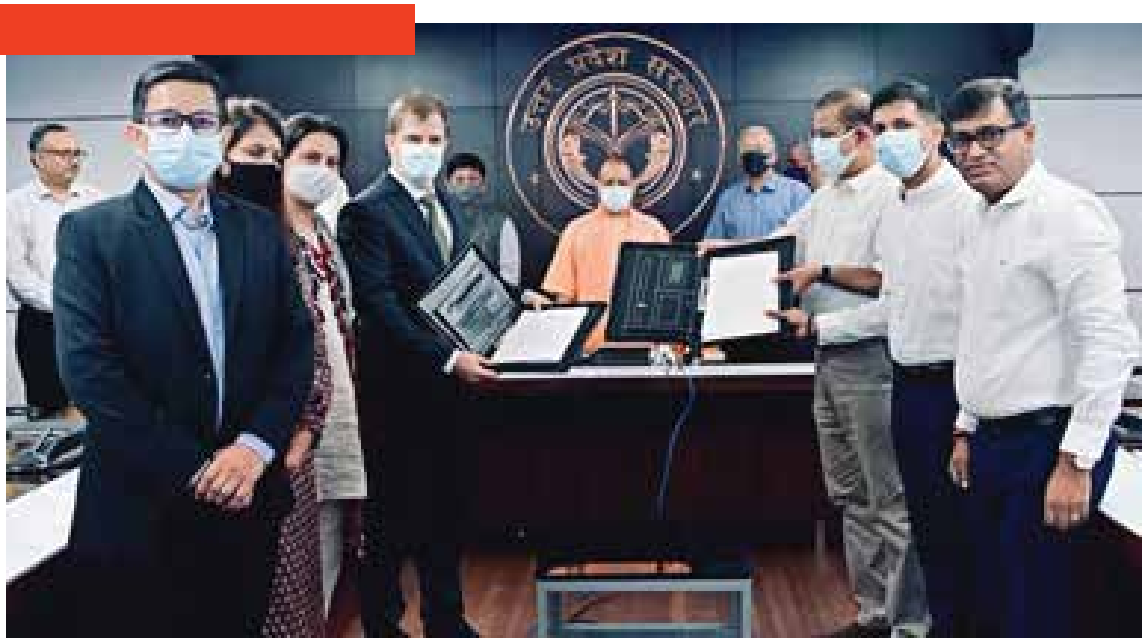
The **Concession Agreement** for the **Noida International Greenfield Airport, Jewar** was signed on 7th October 2020 with the **SPV of Zurich Airport International AG**.

Hon'ble Chief Minister, Uttar Pradesh **approved the name** of the new upcoming International Airport at Jewar as 'Noida International Airport' and its logo with the state bird 'Saras', symbolizing new heights of growth being achieved in the state.



"We're bringing much-needed aviation infrastructure to one of the world's largest metropolitan areas" The Noida International Airport will be a showpiece airport. It will be, claimed **Daniel Bircher, CEO of Zurich Airport International Asia and MD of Yamuna International Airport Pvt Ltd**, a perfect amalgamation of Indian design, technology and hospitality combined with Swiss quality and efficiency.

The **State Support Agreement** for **Noida International Airport**, **Jewar** was signed between the **State Government of Uttar Pradesh**, **Yamuna International Airport Private Limited** and **Noida International Airport Limited** in the gracious presence of the **Hon'ble Chief Minister of Uttar Pradesh on 1st March 2021**.



NIAL has granted **leave, license and Right of Way** for **1316 Ha** of land for the development of **Noida International Airport** to **YIAPL**, an **SPV** of **Zurich Airport AG on 31st July 2021**

The **Substitution Agreement and Escrow Agreement** related to **Noida International Airport** were signed on **10th August 2021** between **NIAL and YIAPL**. Another important milestone in the development of the Airport which will become a game changer in the years to come.

DETAILED AIRPORT PROFILE OF THE DOMESTIC AIRPORTS IN THE STATE

GORAKHPUR

Brief description	The airport belongs to IAF having civil dispersal to cater civil operations.
Surrounding infrastructure	Gorakhpur Airport is located at a distance of 7 kilometers from Gorakhpur Railway Station on the Gorakhpur-Kushinagar Highway (NH-28).
Number of destinations it connects	08 destinations are connected.
Operating model	Operated by IAF/AAI.
Achievements	Before 2017, only one destination was connected from Gorakhpur to Delhi. Currently, the airport offers flights for eight destinations.
Progress so far	The airport is functional.

13th April 2021 - Another milestone for **Gorakhpur Airport**. It has been connected directly to **Ahmedabad** via a **SpiceJet flight**.

DETAILED AIRPORT PROFILE OF THE DOMESTIC AIRPORTS IN THE STATE

PRAYAGRAJ

Brief description	The airport is situated at Bamrauli in Prayagraj district of Uttar Pradesh. It is an IAF airport having civil dispersal to cater civil operations.
Number of destinations it connects	11 destinations are connected.
Passenger handling capacity	0.03 MPPA
Operating model	Operated by IAF/AAI.
Financial model	Land purchase & OLS Removal – state government development works – AAI
Achievements	With the support of state government, AAI has developed a new civil terminal in 2018.
Progress so far	The airport is functional.

DETAILED AIRPORT PROFILE OF THE DOMESTIC AIRPORTS IN THE STATE

HINDAN

Brief description	Hindan Airport is a civil enclave in Ghaziabad, Uttar Pradesh, operated by the Airports Authority of India at Hindan Air Force Station of the Indian Air Force. It is the second commercial airport in the Delhi NCR after Indira Gandhi International Airport. The airport was primarily built to handle flights operating under the Government's regional connectivity scheme.
Number of destinations it connects	02 destinations are connected.
Passenger handling capacity	300 passengers an hour
Operating model	Operated by IAF/AAI.
Financial model	Land purchase & OLS Removal – state government development works – AAI
Achievements	With the support of state government, AAI has developed a new civil terminal in 2019.
Progress so far	The airport is functional.

DETAILED AIRPORT PROFILE OF THE DOMESTIC AIRPORTS IN THE STATE

BAREILLY

Brief description	The airport belongs to IAF having civil dispersal to cater civil operations.
Number of destinations it connects	03 destinations are connected.
Passenger handling capacity	300 passengers an hour
Operating model	Operated by IAF/AAI.
Financial model	Land purchase & OLS Removal – state government development works – AAI
Achievements	With the support of state government, AAI has developed a new civil terminal in 2019.
Progress so far	The airport is functional.

8th March 2021 - Welcomed the **first commercial civil flight** at **Bareilly Airport**, an **Alliance Air flight from New Delhi**.

DETAILED AIRPORT PROFILE OF THE DOMESTIC AIRPORTS IN THE STATE

KANPUR

Brief description	The airport belongs to IAF having civil dispersal to cater civil operations.
Number of destinations it connects	04 destinations are connected.
Operating model	Operated by IAF/AAI.
Financial model	Land purchase & OLS Removal – state government development works – AAI
Achievements	With the support of state government, AAI is developing a new civil terminal.
Progress so far	The airport is functional and after 2017 flights (connected destinations) increased from 0 to 4.

Kanpur Airport
(under construction Terminal Building)

GROWTH IN MRO SECTOR

Significant factors driving local MRO growth in india

DEMAND

- Growth in aircraft fleet
- Aging Fleet
- Developing ecosystem in India
- Availability of cost competitive factors (talent, cheap labour, strategic location

POLICY

- Change in GST Regime GST rate reduced from 18% to 5% with full input tax credit
- MO services provided to foreign recipient in India treated as export.
- Zero tax on service to foreign aircraft in India
- **MO benefits by National AviationPolicy** No import duty on components, Royalty relief by airports, permits to MRO vendors

WAY FORWARD

The rapid development of the aviation sector in Uttar Pradesh is a significant steppingstone to provide air connectivity to citizens, businesses and industries. The civil aviation industry in India has emerged as one of the fastest growing industries in the country during the last three years. India has become the third largest domestic aviation market in the world.

However, major challenges have cropped up in the aviation industry because of the COVID19 pandemic. They range from a drastic drop in commercial revenue to market distortions that affect future investments and assets rebalancing. A variety of factors such as incapacitated demand outlook, reduced revenues, high asset servicing costs and low liquidity pose huge difficulties for the industry players. Furthermore, the pandemic and the subsequent lockdowns spell a long-term impact on travel and work preferences, customer behavior, trade, tourism, regulation and mobility in general, with repercussions on demand, growth and sustainability of the aviation sector.

To combat the disruption of global value chains and the loss of millions of jobs due to the pandemic, a renewed aviation strategy and collaboration of airlines, airports, government, regulators, and financial institutions is the need of the hour. Provision of adequate financial support and fiscal relief is extremely vital - waiver or deferment of revenue share payments, concession fees, import duties, royalties and increased credit through soft loans or short-term working capital support are some streams of possible financial aid. The tariff regulation approach needs to be straightened out – with appropriate attention towards transforming the framework towards delivering better economic as well as commercial outcomes.

The success of Ude Desh Ka Aam Naagrik (UDAN) - the regional connectivity scheme that was launched to connect underserved and unserved locations in India at affordable rates to bring air travel close to common person, speaks volumes about the potential of the sector. Under the UDAN scheme, over 900 new routes have been ratified in the last few years, out of which air service has already commenced on more than 350 routes. More than 50 airports, which were not in service earlier, have been made operational. The way forward would entail lower taxes, lighter regulation and better financial incentives, which can enhance the competitiveness and profitability of the industry. A renewed vision should be embarked on, across the board – one that allows for creation of more jobs, and investments to be channeled throughout the aviation ecosystem.

उड़े देश का आम नागरिक

UDAN

Ude Desh ka Aam Naagrik

Data-analytics, technology and e-governance are the key to building a post-pandemic growth strategy. Private financing and institutional funding are necessary to invest in digital assets and capacity building, which leads to enhancement of business value. The foundation of the strategy and policy should be thorough research and analysis into the industry growth drivers, market economics, industry expectations and cost-benefit studies. This will aid the rationalization of policy initiatives, and provide a basis for evaluation of key programs to advance the economic outcomes.

Upcoming opportunities like green solutions should be duly explored, and strategic attempts to improve manufacturing capacity and satellite-based navigation must be undertaken. There should be focus on crafting an amiable customer experience. The monetization of assets, recruitment of global talent, incentivizing performance and protecting intellectual property are the core drivers of progress.

Hence, innovations in design, technology and financing will go a long way in significantly reducing the cost of providing services for both airlines and airports. The vision of sustainability should be incorporated to increase asset productivity and improving operational efficiency. A strong political commitment and robust stakeholders will lead to the achievement of strategic goals. Expedient policy changes will drive the industry to create output in the form of jobs, incomes and wider economic benefits - creating a roadmap for the future of India's aviation sector.
